

Sprint Review

14/12/2023

Group 04 – Group Nice

What went well

- All members did their parts responsibly
- Project vision and details have been defined, now only implementation, fixing bugs and testing left

What to improve

- Implementation progress has not been fast enough
- Due to the difference in studying schedule and deadlines so there aren't as many meetings as other sprints
- Some work was delayed due to some trouble updating source code to the github platform

Action items

- Each member will try their best to commit some of their work on Github every 2-3 days.
- Because of the lack of classes in the next few weeks, more meetings will be held to iron out difficulties of any member.
- Core features will be tested as soon as possible
