

# **Sprint Review**

## **Group 04 – Group Nice**

What went well ?

- Most of the work is done on time.
- All members attend meetings.
- Project as a whole is still up to the schedule.
- Team members are now using communication tools more frequently and confidently.

What to improve?

- Some parts of the schedule coincide with other important deadlines of other subjects that lead to some deadline extension.
- The skill to convey presentations and ideas in front of many people (same as last week).
- The ability to work together at the same time effectively on Draw.io or similar programs.

Action items ?

- Planning for the next sprint will also account for major deadlines of other subjects to minimize delay.
- Each member should look back on the project as the whole and prepare for coding assignments next week.
- The reviewer should note down the things they don't understand or they think need correcting more specifically.
